

GLOBAL PRESENCE OF YOUR RESEARCH AT DENTISTRY 2020

Dr. VAHIDEH NASR,

Shahid Beheshti University of Medical Sciences, Tehran, Iran, Email: dft.nasr@yahoo.com

Dentistry 2020:

In Japan, almost 60% of 5-year-olds are found with no cavities, but others have more than ten seriously decaying tooth disorders. The dental health awareness in Japan has dramatically increased over the past 40 years. As these are the major reasons for tooth loss, their prevention in adults is important and yet a major challenge. In addition to this, Japanese women are opting for [dental](#) procedures to enhance their appearance, which helps in increasing the [overall market](#). In recent years, a larger number of women have undergone dental procedures in Japan. Hence; an increasing number of disposable incomes have encouraged [dental procedures](#), which are currently driving the dental consumables market.

Importance and Scope:

[Dental health](#) is imperative in light of the fact that it not only gives a healthy smile which increases your self-confidence, but also lessens facial or oral pain, and reduces the risk of gum disease. As per the Academy of General Dentistry, there is a relation between gum (periodontal) disease and health problems, for example, stroke and [heart disease](#). Women with gum disease may show higher frequencies of pre-term, low birth-weight babies. Absence of dental hygiene can cause digestion problems. The breakdown of food physically and chemically starts in your mouth. So if there is a problem in your mouth it can lead to [digestive problems](#). Dental wellbeing starts soon after birth and proceeds with the rest of your life. Great oral wellbeing practices and regular visits to dental experts will enable you to enjoy the advantages of a brilliant smile and a pain free mouth.

[Dentistry 2020](#) is an international platform for research about Dentistry, trading thoughts regarding it and in this manner, helps in the dissemination of information in marketing for the advantage of both the scholarly community and business. This conference will unite business, innovative, pioneers, Academics of both Dental, Oral Health from different parts of the world.

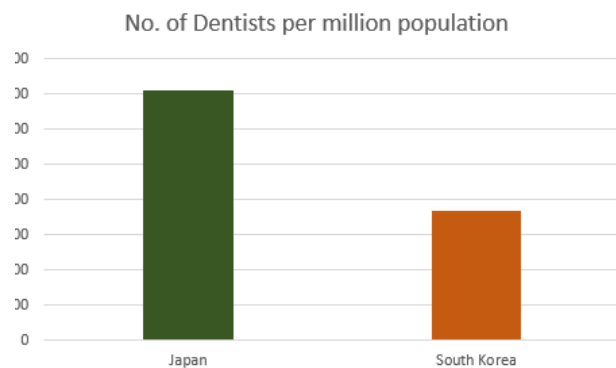

Figure1: Dentists Population in Japan and South Korea
