

Spasmodic Dysphonia

Redwan Kalash

Fakeeh University Hospital, United Arab Emirates

Abstract

Spasmodic dysphonia is a rare idiopathic organic dysphonia.

The presentation will highlight briefly this disorder (anatomy, physiology, pathophysiology, diagnosis and treatment).

The presentation is directed to general ENT specialist, family doctors, GPs and SLP aiming to raise awareness of these diseases and make it easy for doctors to diagnose this disease and to have a general idea about treatment options.
